Category: Pregnancy

PP Offer : **20% off any package (up to \$40 value) or a Free Gender Reveal Balloon.**

Aisha and 2yo Frankii ready for the scan

Elise and I felt very privileged to be pregnant together and be able to both experience a 3D/4D scan at Beautiful Beginnings Ultrasound!

As we walked into the Beautiful Beginnings studio we were greeted by the lovely Louisa, owner and sonographer who conducts the scans. The studio setting is very relaxed and inviting - it feels like you are in your lounge room and you can invite your whole family to watch this special moment!

We both bought our husbands and 2 yr. old toddlers along which we were initially unsure about (particularly the toddlers) but Louisa makes you feel like you are at home and ensures you and your guests are comfortable and included in the experience.

The mumma to be is set up on a bed while guests can sit back and watch the magical experience on a big screen which is in the middle of the room.

Watching your baby come up on the big screen was incredible and so life like. It was amazing how clear the 4D imagery was - I even got a video of baby moving around in the womb and yawning.

During the scan Louisa also explained everything to us; what body parts we were looking at, and how the baby was positioned. During Elise's visit her baby was not cooperating with its hands over its face, however with a bit of patience and repositioning Louisa was able to capture some amazing images. Louisa was also very happy to answer any questions we had during the visit.

BUSINESS REVIEW

Aisha and her family all enjoyed the ultrasound experience

On leaving your scan you get to take home printed photos of your baby and a USB with all the photos! Louisa also emailed us the movie she captured whilst the baby was moving! I think I've shared that a dozen times!!

All in all the experience was amazing and we would both highly recommend it to anyone expecting. The pictures and movie we got to take home are invaluable and will be a treasured keepsake.

My husband and I were so excited that Louisa could capture such a special moment... isn't technology just amazing!? We are very lucky.
